EDUCATION

Ph.D.	School Psychology University of Maryland, College Park (APA- & NASP-Approved Program)	August 2009
M.A.	School Psychology University of Maryland, College Park	December 2006
B.A.	Psychology; English Minor, Honors University of California at Santa Barbara	June 2002

ACADEMIC APPOINTMENTS

Research Assistant Professor	University of Oregon <i>Behavioral Research and Teaching</i>	08/2015 – present
Research Associate	University of Oregon <i>Behavioral Research and Teaching</i>	09/2011 – 07/2015
Postdoctoral Research Fellow	University of Oregon <i>Behavioral Research and Teaching</i>	07/2009 – 08/2011

GRANTS

Measuring Oral Reading Fluency: Computerized Oral Reading Evaluation (CORE)

U. S. Department of Education, Institute of Education Sciences

Principal Investigator (PI)

Budget \$1,599,289

August 2014 – July 2018

The purpose of this grant is to develop a computerized assessment system of oral reading fluency that contains an automated scoring algorithm based on a speech recognition engine and a latent variable psychometric model.

A Collaboration for the Advancement of Assessment Models Using Bayesian Networks

University of Oregon, Idea Award

Principal Investigator (PI)
Budget \$4,777
March, 2014

The Relation Between Instructional Context and Student Responsiveness to Intervention

Society for the Study of School Psychology, Early Career Research Awards Program

Principal Investigator (PI)

Budget \$9,704

September 2015 – August 2016

The purposes of this grant are to: (a) describe the instructional context of Tier 2 and Tier 3 reading interventions in a sample of students in schools/districts across the country applying an academic RTI framework, (b) model reading growth/gains of these students, and (c) analyze the effects of instructional variables on student reading growth and gains to determine what instructional components contribute to responsiveness.

Bayesian System as Basis for Teacher Decision Making: BaySys

U. S. Department of Education, Institute of Education Sciences

Principal Investigator (PI)

Pending

September 2016 – August 2020

We propose to develop and validate a system based on probabilistic estimations from a dynamic Bayesian network model that serves as the basis for instructional decision-making for teachers using applied screening and formative assessment systems in a Response to Intervention (RTI) framework.

An Inquiry into Reliability of Growth Trajectory

U. S. Department of Education, Institute of Education Sciences

Co-PI

Unfunded

The purpose of this grant is to develop and investigate reliability estimation methods for growth trajectory under linear and polynomial growth curve models.

PROFESSIONAL INTERESTS

My research involves educational assessment and applied measurement, focusing on developing and improving systems that support data-based decision making, and using advanced statistical methods to measure and monitor student growth.

SCHOLARSHIP
